

**STUDIO TECHNOLOGIES FEATURES 5100-SERIES MODULES
AND LIVE-LINK™ JR. AT CCW 2012**

Company to Demonstrate the New 5152 Module for Attendees

NEW YORK, 14 NOVEMBER 2012 – **Studio Technologies**, the manufacturer of tailored high performance video, audio and fiber-optic products for the professional audio, installation and broadcast markets, showcases its **5100-Series** remote controlled modules and its **Live-Link Jr.** Remote Camera Interface System at the 2012 CCW Expo (Booth 1251). Studio Technologies will be demonstrating its new Model 5152 Video Generator/Audio Embedder module throughout the show in order to give attendees an inside look at the unique functionality of the product.

On display will be Studio Technologies audio, intercom, video and fiber optic products, intended for use in broadcast and post-production applications, including ENG/SNG, sports, and corporate/government. The 5100-Series, including the new line of video generator, intercom interface, power entry, remote access and Ethernet switch modules, allow custom applications to be easily created. Featured will be the new Model 5140 Intercom Interface Module, Model 5152 Video Generator/Audio Embedder Module and Model 5162 Video Generator/Audio De-Embedder Module.

Studio Technologies' Live-Link Jr. Remote Camera Interface System will also be on display. Live-Link Jr. offers one 3G/HD/SD-SDI video path in each direction, on-air and cue audio, integrated end-to-end party-line intercom system, 4-wire intercom interfacing over two single mode fiber cables allowing for easy deployment and reliable operation.

Additionally, Joseph Fiber Solutions will be at the booth for the duration of the show showcasing integrated production packages featuring Studio Technologies products.

About Studio Technologies, Inc.

Studio Technologies, Inc. provides tailored, high-performance video, audio and fiber optic products for the professional audio and broadcast markets. The company was founded in 1978 with a commitment to design and manufacture dependable, individualized solutions for broadcast studio, stadium and corporate environments. Known for “designing for the way professionals work,” the company is recognized as an industry leader that has never wavered from its individualized design pledge. Product categories include fiber-optic transport, broadcast support, mobile broadcast, intercom and IFB, announcer consoles, loudspeaker monitor control systems and sound pressure level monitor systems.
